**LOOK**

Field Seed may be shipped to Southern territory in cars containing 40,000 pounds or more of grain, grain products and/or mixed feed at their own respective carload rates. This represents a big saving to the carlot buyer of feed. Unfortunately, Garden Seed are not included in the new tariff. **MIXED CARS OF SEEDS, FEEDS AND GRAIN ARE OUR SPECIALTY.** Our connections and our location enable us to compete in quality and price. All our seed are re-cleaned, tested and tagged to comply with seed laws. Samples, analyses and delivered prices furnished on request. If you are not a carlot buyer we may be able to include your seed in a car going to a nearby point.

NOTE—Non-Warranty: We give no warranty express or implied as to the purity, description, quality, productiveness or any other matter of any seeds, bulbs or plants we will send out, and we will not be in any way responsible for the crop. Seamless bags 30c each.

## EDIBLE SOY BEANS

Here is something new that you will surely want to introduce to your customers. They can be eaten in the green stage about the same as butter beans and are very nutritious. They may also be used as dry shell beans, and the Tokn variety is particularly good as a dry shell bean. The Jogun variety has a very pleasing nutty flavor.

**HYBRID SEED CORN**  
HYBRID SEED CORN—Wood's Southern Prolific Hybrids were developed on southern farms from adapted southern varieties. Hybrid Seed Corn is not a passing fancy. We believe within a few years time 90% of the corn grown in the United States will be Hybrid corn. Don't make the mistake of buying Northern grown hybrids that are not adapted to the South. We have several strains to select from. It costs less than \$100 per acre to plant the best hybrids and increased yields of 15% to 30% may be expected. Write for illustrated folder giving information in detail.
